PROFESSIONAL SUMMARY

Front-end focused Software Engineer with 5 years of experience building responsive, scalable web applications in Angular, React, and TypeScript. Delivered 55+ reusable components and 10+ production modules across AI-driven advertising, IoT, and healthcare platforms, reducing load times by up to 35% and feature development time by 30%. Experienced in RESTful API integration, RxJS state management, CI/CD pipelines, and Agile delivery, with working knowledge of Java, Spring Boot, and SQL on the backend.

PROFESSIONAL EXPERIENCE

AdMaxLocal — Frontend Developer, Engineering Team

Bangalore, India | Sep 2024 - Sep 2026

- Drove front-end development of AdMax, an AI-driven advertising platform serving ad creation, testing, automation, and performance insights, contributing to 8+ major feature releases.
- Built 25+ reusable Angular and React components that cut new ad-creation feature development time by approximately 30%.
- Reduced dashboard load times by around 35% through code refactoring, lazy loading, and efficient RxJS state management.
- Integrated 15+ RESTful API endpoints to power real-time ad performance data, eliminating manual reporting steps for campaign managers.
- Translated design mockups into pixel-perfect, responsive UI with Tailwind CSS and Angular Material, achieving consistent rendering across 10+ device and browser combinations.
- Implemented form validation and error-handling flows in the ad-creation module, reducing user input errors by roughly 40%.
- Resolved 100+ cross-browser UI defects with QA teams, improving release stability and cutting post-release bug reports.
- Mentored 2 junior developers on Angular and React best practices, shortening onboarding time and raising code-review pass rates.
- Partnered with product and data teams across 2-week Agile sprints, consistently delivering committed scope on schedule.

IMTAC India Pvt Ltd — UI Developer, Empyreal Universe

Bangalore, India | Dec 2021 - Sep 2024

- Delivered 3 core IoT modules including a Street Light Map, an analytics dashboard with advanced chart visualizations, and asset/statistics listings used by municipal operators.
- Upgraded 4 Angular projects from CLI 9 to 16, improving build performance and removing deprecated dependencies with zero production regressions.
- Architected 30+ scalable, modular components using Angular Material and RxJS, establishing state-management standards adopted across the team.

IMTAC India Pvt Ltd (continued)

- Maintained production stability for 7+ consecutive months with no major incidents by owning the full project lifecycle and CI/CD pipeline.
- Built interactive chart visualizations that reduced the time operators needed to interpret street-light performance data.
- Raised unit test coverage to 80%+, catching regressions earlier and reducing defects reaching QA.
- Secured user sessions across all modules by implementing Keycloak-based authentication and role-based access control.
- Configured and maintained Tomcat server deployments, supporting reliable release rollouts.

ICT Health (Informal Collaborate Transform) — Full Stack Developer

- Developed and maintained patient-care software using JSF, Oracle, and Java in a regulated healthcare environment.
- Built an appointment scheduling system and enhanced the patient portal, streamlining booking workflows for clinical staff.

SKILLS & OTHER

Core Technologies:

Angular (CLI 9–16), TypeScript, JavaScript (ES6+), HTML5, CSS3, React, Tailwind CSS, SQL, Java, JSF, Oracle

Frameworks & Libraries:

Angular Material, Bootstrap, RxJS, Spring Boot, API Gateway

IDE & Tools:

VS Code, Eclipse, STS, Postman, PgAdmin, SQL Developer, Jenkins, Keycloak (V12), WinSCP, Putty

Version Control:

Git, GitHub, SVN, Bitbucket

Agile Methodologies:

Scrum, Kanban, Agile project lifecycle management

Others:

CI/CD Pipeline, State Management, Performance Optimization, Chart Visualizations, Project Management, Task Planning

Domains of Interest:

IoT, Healthcare, Education

Soft Skills:

Project Management, Task Planning, Collaboration, Problem Solving, Team Work

EDUCATION

E.G.S. Pillay Engineering College, Nagapattinam, Tamil Nadu

B.Tech – Information Technology | 2017 – 2021 | 88%

M.E – Computer Science and Engineering | 2025 – Expected May 2027

PORTFOLIO & GITHUB

GitHub: github.com/dharanijayachandran

KEY PROJECTS

Markdown Live Previewer

JavaScript, HTML5, CSS3

Split-pane Markdown editor with a real-time rendered preview, browser-side autosave, and export to .md or .html — no backend, no build step.

[Live Demo](#) | [Code](#)

QR Code Generator

JavaScript, HTML5, CSS3

Turns a link, plain text, Wi-Fi login, email, phone number, or contact card into a downloadable QR code, with customizable size and colors, entirely client-side.

[Live Demo](#) | [Code](#)

Expense Tracker

Angular, TypeScript, Local Storage

Logs income and expenses, tracks a running balance and spending by category, and exports everything to CSV — data stays entirely in the browser.
